SUPPORTING STATEMENTS – this document should be read in conjunction with the following statements:

SAFEGUARDING IS EVERYBODY'S BUSINESS

All Mersey Care NHS Foundation Trust employees have a statutory duty to safeguard and promote the welfare of children and vulnerable adults, including:

- being alert to the possibility of child/vulnerable adult abuse and neglect through their observation of abuse, or by professional judgement made as a result of information gathered about the child/vulnerable adult;
- knowing how to deal with a disclosure or allegation of child/adult abuse;
- undertaking training as appropriate for their role and keeping themselves updated;
- being aware of and following the local policies and procedures they need to follow if they have a child/vulnerable adult concern;
- ensuring appropriate advice and support is accessed either from managers, *Safeguarding Ambassadors* or the trust's safeguarding team;
- participating in multi-agency working to safeguard the child or vulnerable adult (if appropriate to your role);
- ensuring contemporaneous records are kept at all times and record keeping is in strict adherence to Mersey Care NHS Foundation Trust policy and procedures and professional guidelines. Roles, responsibilities and accountabilities, will differ depending on the post you hold within the organisation;
- ensuring that all staff and their managers discuss and record any safeguarding issues that arise at each supervision session

EQUALITY AND HUMAN RIGHTS

Mersey Care NHS Foundation Trust recognises that some sections of society experience prejudice and discrimination. The Equality Act 2010 specifically recognises the *protected characteristics* of age, disability, gender, race, religion or belief, sexual orientation and transgender. The Equality Act also requires regard to socio-economic factors including pregnancy /maternity and marriage/civil partnership.

The trust is committed to equality of opportunity and anti-discriminatory practice both in the provision of services and in our role as a major employer. The trust believes that all people have the right to be treated with dignity and respect and is committed to the elimination of unfair and unlawful discriminatory practices.

Mersey Care NHS Foundation Trust also is aware of its legal duties under the Human Rights Act 1998. Section 6 of the Human Rights Act requires all public authorities to uphold and promote Human Rights in everything they do. It is unlawful for a public authority to perform any act which contravenes the Human Rights Act.

Mersey Care NHS Foundation Trust is committed to carrying out its functions and service delivery in line the with a Human Rights based approach and the FREDA principles of **Fairness, Respect, Equality Dignity, and Autonomy**

EXECUTIVE SUMMARY

This policy defines the framework to ensure the Trust meets its obligations in relation Information Governance and Information Risk.

Implementation of and adherence to this policy will ensure:

- Information is held, used and obtained in accordance with the Data Protection Act 1998 and Freedom of Information Act 2000.
- Information is safeguarded against the risk of data breach, loss, damage, destruction.
- Information is used in accordance with HSIC Guidance and NHS Code of Practice on Confidentiality
- Information is stored in accordance with the NHS Code of Records Management.
- Staff are trained and aware of their responsibilities in respect of Information Governance and Confidentiality.
- This policy is applicable to all staff working for, or with, Mersey Care NHS Trust who work with Organisational or Personal identifiable information.

This policy should be read in conjunction with the following Trust policies:-

- IM&T Security Policy
- Confidentiality and Information Sharing Policy
- Data Protection Act Policy
- Freedom of Information Policy
- Corporate Records Management Policy
- Corporate Health Records Policy

INTRODUCTION

1.1 RATIONALE

Mersey Care NHS Foundation Trust recognises the importance of information, both in the terms of the clinical management of individual patients and the efficient management of services and resources. Information Governance policies play a key part in supporting Clinical Governance, service planning and performance management. Adherence to robust policies also gives assurance that information is dealt with legally, securely, efficiently and effectively, in order to meet legal and good practice responsibilities.

The Trust Board has also approved the introduction and embedding of information risk management into the key controls and approval processes of all major business processes and functions of the Trust. This decision reflects the high level of importance placed on minimising information risk and safeguarding the interests of service users, staff and the Trust itself.

Information risk is inherent in all administrative and business activities and everyone working for, or on behalf of, the Trust continuously manages information risk. The Board recognises that the aim of information risk management is not to eliminate risk, but rather to provide the structural means to identify, prioritise, and manage the risks involved in all Trust activities. It requires a balance between the cost of managing and treating information risks with the anticipated benefits that will be derived.

The Board acknowledges that information risk management is an essential element of broader information governance and is an integral part of good management practice. The intent is to embed information risk management in a very practical way into business processes and functions. This is achieved through key approval and review processes / controls – and not to impose risk management as an extra requirement.

The Director of Information, Performance and Improvement, is the nominated Senior Information Risk Owner (SIRO) for the Trust and the Medical Director is the nominated Caldicott Guardian for the Trust. The Information Governance Manager is the lead for Information Governance within the Trust.

1.2 SCOPE

This policy applies to all staff and contractors who undertake any activity within the organisation.

This policy covers all aspects of information use and information risk management within the organisation, including but not limited to:-

- Patient/Service user information
- Personnel information
- Organisational Information
- Information Assets

The policy covers all aspects of handling information including, but not limited to:-

- Structured record systems-paper and electronic
- Transmission of information - fax, email, post and telephone.

This policy covers all information systems purchased, designed, developed and managed on the behalf of, the organisation and any individual directly employed or otherwise by the Trust.

The Trust's Information Governance Committee has overall responsibility for overseeing the implementation of the Information Governance framework and is accountable to the Executive Committee, who will in turn ensure that Information Governance and Information Risk Management is embedded within the organisation structure. The Trust's Information Governance Committee has 'day to day' operational responsibility to promote and implement compliance with the Information Governance framework.

1.3 PRINCIPLES

Information Governance ensures that one of the Trusts most important assets, information, in both clinical and management terms, is respected and held in a secure and manageable conditions. It is therefore of paramount importance to ensure that information is efficiently managed on the basis of the HORUS categorization:

- Held safely and confidentially
- Obtained fairly and effectively
- Recorded accurately and reliably
- Used effectively and ethically
- Shared appropriately and lawfully

The Trust has put into place a range of appropriate policies, procedures and management arrangements to provide a robust framework for Information Governance. It will maintain polices and procedures to ensure compliance with the requirements of the Information Governance Toolkit.

POLICY

The Information Governance Policy has been developed to provide a robust assurance framework that the Trust will work within to meet current legislation. The Information Governance (IG) agenda is driven by Department of Health (DoH) policy that, itself, is derived from a need to comply with obligations imposed by key 'data handling' legislation. These are, primarily, the Data Protection Act 1998 and Freedom of Information Act 2000 but include other relevant legislation. These statutory obligations are supplemented by further DoH/NHS policy recommendations that define the scope of the IG agenda and all obligations placed on NHS trusts by it. This policy is driven by a recognised need to handle both personal and corporate information in an appropriate manner through the creation and maintenance of an internal IG framework. A suitably robust IG framework will:-

- Contribute to the delivery of compliance, as defined
- Ensure all aspects of information quality in the delivery of healthcare services to local citizens, and
- The appropriate use of corporate data for Trust purposes.
- Protect the Trust, its staff and its patients/service users from information risk, where the likelihood of occurrence and the consequences are significant.
- Encourage proactive risk management, provide assistance to, and improve the quality of, decision making throughout the Trust and help to safeguard the Trust's information assets.

Annual completion of the IG Toolkit is the 'backbone' of evidence provided by the Trust which enables measurement of current data handling standards and any improvements made to them, year on year. Further details of the Trust Information Governance framework are in section 3 of this policy.

IMPLEMENTATION

There are 4 key interlinked strands to the Information Governance Agenda.

- Openness
- Legal Compliance
- Information Security
- Quality Assurance

3.1 Openness

The Trust recognises the need for an appropriate balance between openness, its duty of candour and confidentiality in the management of information and its uses.

Information will be identified and where appropriate kept confidential, underpinning the principles of Caldicott and the regulations and principles as outlined in the Data Protection Act 1998. Confidential information held by the Trust will be available to the public through a variety of means to ensure compliance with the Freedom of Information Act 2000 and the Environmental Information Regulations 2004.

Patients/service users have access to information relating to their own healthcare, options for treatment and their rights as patients/service users. There are clear policies, procedures and arrangements for handling queries from patients and the public.

The Trust has clear procedures and arrangements for liaison with the press and broadcasting media.

Requirements of all information will be developed, monitored and maintained to ensure that it is appropriate for the purposes intended.

Availability of information for operational purposes will be maintained within set parameters relating to its importance.

The Trust will ensure that the exchange/sharing of any information is only carried out when necessary, within the scope of the Trust's Data Protection Registration and within strict guidelines under which information was obtained and outlined at the time or with the person's consent.

The Trust has established and maintains policies and procedures to ensure compliance with the Data Protection Act, Human Rights Act, the common law duty of Confidentiality and the Freedom of Information Act.

Training in Information Governance will be provided to all staff upon Induction and thereafter on an annual basis to ensure they are aware of their responsibilities.

Risk assessment, in conjunction with overall priority planning of organisational activity will be undertaken to determine that appropriate, effective and affordable information governance controls are in place.

3.2 Legal Compliance

Mersey Care NHS Foundation Trust is obliged to comply with all relevant UK and European Union legislation. Policies assume that the requirement to comply will be devolved to employees and agents of the Trust guided by policies and standard operating procedures who may be held personally accountable for any breaches of security for which they may be held responsible.

The Trust will undertake or commission annual assessments and audits of its compliance with legal requirements and/or provide the information to undergo these assessments of compliance.

The Trust regards all identifiable personal information relating to service users and staff as confidential, except when law dictates otherwise.

The Trust has established and maintains policies to ensure compliance with the Data Protection Act, Human Rights Act and the common law Duty of Confidentiality.

The Trust has established and maintains policies for the controlled appropriate sharing of patient information with other agencies, taking account of relevant legislation (e.g. Health and Social Care Act and the Crime and Disorder Act, Children Act, etc)

3.3 Information Security

The Trust has established and maintains policies for the effective and secure management of its information assets and resources.

Audits are being undertaken or commissioned to assess information and Information Technology security arrangements.

The Trust promotes effective confidentiality and security practice to all its staff through policies, procedures and on-going training.

The Trust will adhere to a clear desk and screen policy, where by all desks will be clear of any working documents or print outs at the end of the working day, and no Visual Display Unit screen will be left unattended at anytime displaying data – automatic system “time-out” application must be in place for systems that are capable of displaying any personal identifiable information.

The Trust requires its staff to ensure that all sensitive, personal and critical data is locked away when not in use – passwords must not be shared by staff or written down and left on display within areas which could lead to unauthorised access to systems.

Network screen warnings should be in place at network system log-on to remind staff of their responsibilities and that audit functionality is in place and monitoring will be undertaken.

The Trust’s incident reporting system is used to report, monitor and investigate all breaches or potential breaches of confidentiality and security. All suspected breaches of

confidentiality or data loss must be reported as per the Trust Adverse Incident reporting policy.

Review of incidents will be undertaken at the Information Governance Committee meeting chaired by the SIRO. The Executive Committee will be provided with bi-monthly IG Chair's reports for assurance purposes. Each Division will receive regular reports in order to investigate issues, identify trends and minimise risk and in turn provide an incident investigation report back to the SIRO and Information Governance Committee

3.4 Information Risk Management

Whilst the Risk Management Strategy and associated risk management policies are applicable to all risks, this policy also identifies those additional measures which are specific to the management of information risks.

Definitions associated with risk management

Risk – the chance of something happening, which would have an impact upon objectives. It is measured in terms of *likelihood* and *severity*

Risk Management Process – the systematic application of management policies, procedures and practices to the task of establishing the context and identifying, analysing, evaluating, treating, monitoring and communicating risk.

Consequence – the outcome of an event or situation, expressed qualitatively or quantitatively, being a loss, disadvantage or gain. There may be a range of possible outcomes associated with an event.

Information Risk – a risk that relates to the loss, damage, or misuse of information or which threatens the confidentiality, integrity or availability of an information asset, especially information which is personal or confidential in nature. This includes cyber security incidents.

Likelihood – a qualitative description for probability or frequency.

Risk Assessment – the overall process of risk analysis and risk evaluation.

Risk Management – the culture, processes and structures directed towards the effective management of potential opportunities and adverse effects. The aim is to ensure that the approach to risk management:

- Takes full advantage of existing authority and responsibility structures where these are fit for purpose
- Associates tasks with appropriate management levels
- Avoids unnecessary impacts on day to day business
- Ensures that all the necessary activities are discharged in an efficient, effective, accountable and visible manner

Risk Treatment – selection and implementation of appropriate options for dealing with risk which, conceptually, will involve one or a combination of the following strategies:

- Risk avoidance

- Reduction in the likelihood of occurrence
- Reduction in the consequences of occurrence
- Risk transference
- Risk tolerance / acceptance

Information Assets – in general Information Assets will be administration systems or database used to process Personal Identifiable Data (PID) directly or used in any way that has the potential to affect the confidentiality / integrity / availability / legal processing of PID. The following outlines the main examples of Information Assets:

- Databases and data files
- System information and documentation
- Back-up and archive data
- Operations and support procedures
- Audit data
- Applications and system software
- Data encryption utilities
- Development and maintenance tools
- Paper records (including patient and staff records)
- Environmental services necessary for the safe operational of Information Assets (e.g. power and air conditioning)
- Business continuity plans

Information Governance Compliance Framework – an Information Governance compliance monitoring and management tool available for review on line.

The aim of information risk management is to:-

- Protect the Trust, its staff and its patients from information risks where
- the likelihood of occurrence and the consequences are significant
- Provide a consistent risk management framework in which information risks will be identified, considered and addressed in key approval, review and control processes
- Encourage proactive rather than reactive risk management
- Provide assistance to, and improve the quality of, decision making throughout the Trust;
- Meet legal or statutory requirements
- Assist in safeguarding the Trust's information assets

The key requirement is for information risk to be managed in a robust way within work areas and not to be seen as something that is the sole responsibility of ICT or Information Governance staff. Assurance needs to be provided in a consistent manner. To achieve this, a structured approach is needed, building upon the existing Information Governance Compliance Framework. This structured approach relies upon the identification of information assets and assigning 'ownership' of assets to senior accountable staff (Information Asset Owners).

Information Asset Owners (IAOs) are designated Senior Managers responsible for ensuring that IAOs are senior individuals involved in running the relevant business / service areas. The IAO role is to:

- understand and address risks to the information assets they 'own'
- provide assurance to the SIRO on the security and use of these assets
- complete the National IG training tool e.learning module "Risk Management for SIROs and IAOs" annually.

Information Asset Administrators (IAAs) are operational staff with day-to-day responsibility for managing risks to their information assets. The IAAs are responsible for ensuring information risk is managed appropriately and for providing assurance to the Information Asset Owners and Senior Information Risk Owner.

To do this they will:

- ensure that policies and procedures are followed
- recognise potential or actual security incidents
- consult the IAO and SIRO on incident management
- ensure that information asset registers are accurate and maintained and kept up-to-date
- complete the National IG training tool e.learning module "Risk Management for SIROs and IAOs" annually

Management Lead

Managers must acknowledge that information is valuable and risks must be mitigated. They must portray the importance of handling information through their decisions and actions.

- All staff should know good information handling as part of their job
- All staff must undertake Information Governance Training upon Induction and then on an annual basis.
- Senior staff will understand they are bound by the same rules as junior staff. They must not override, for reasons of convenience, risk controls
- All staff should be able to answer general questions about information protection and make sensible information risk decisions for themselves, including knowing the limits of their competence and when to defer to others for guidance
- All staff personal development plans should include competencies on information handling
- It is the responsibility of the Trust Board to ensure that the Trust has an open approach to incidents and learning
- The Trust Board must encourage staff to question instructions that seem inappropriate on information risk grounds and must encourage reporting on instances of inappropriate behaviour

Information Risk Management Programme

An information risk management programme must be aligned to the Trust Business Plan to support individual objectives and ensure they are adequately resourced. The information risk management programme should cover:

- The balance between level of risk, tolerance of risk and the effort being used to manage the risk
- Identification of gaps between the current and target risk positions
- Progress being made against agreed information risk priorities

- The effectiveness of the risk management controls including successes and failures

Information Risk Mitigation

Information risk mitigation must:

- Be commensurate with the level of risk – it does need to remove the risk entirely
- Be kept simple so that it is manageable and can be communicated to staff
- Include monitoring and reporting on the on-going level of information governance / confidentiality / information security breaches, so that the effectiveness of the protection being achieved can be assessed
- Risk must be assessed in terms of the general level of harm that could be reasonably caused if data were to become compromised or unavailable
- Take the form of a wide range of controls directed at reducing the likelihood of an information (confidentiality, integrity or availability) failure and reduce the amount of harm a failure could cause
- Control and reduce the likelihood and amount of harm of a failure and enhance overall mitigation
- Apply 'good practice' controls, which are easy for staff to understand and apply
- Be supplemented with customised controls for specific high risk circumstances

Information Incidents

All incidents that constitute an actual or potential loss of information, which could potentially lead to a breach of confidentiality, are to be reported directly to the Risk Management Department. All such incidents must be documented on an Adverse Incident Form, and could involve:-

- Loss or breach of Service User information
- Loss or breach of staff information
- Loss or breach of confidential business information
- Loss of hardware:
 - Laptops
 - iPads
 - mobile phones
- Virus attacks
- Unauthorised access to systems / information assets
- Misuse of systems / privileges
- Cyber security incidents

Each incident reported will be reviewed by the Information Governance Manager in order to ensure that serious data breach incidents are assessed as to whether they meet the Information Commissioner's Office reporting criteria and are formally reported via the Information Governance Toolkit.

The Information Governance Manager will advise the area on the immediate controls that need to be implemented to mitigate the risk of reoccurrence.

The Information Governance Manager will liaise with the Senior Information Risk Owner and Caldicott Guardian to ensure that any service users or staff whose personal data has been breached is duly notified. This will be either by formal letter signed by the Senior Information Risk Owner or Caldicott Guardian or if the service user is clinically unwell the designated clinical team will undertake the decision on when the service user is informed

of the data breach incident and a record of this will be recorded within the clinical records.

All incidents reported to the Information Commissioner's Office will have a full Root, Cause Analysis investigation undertaken, the investigation report will be overseen by the SIRO, Caldicott Guardian and Information Governance Committee in order ensure that full assurance in risk mitigation is identified.

Information Asset Register Maintenance

Information Asset Owners responsible for overseeing the completion and regular review and update of their Information Asset Registers. Amendments and updates are more likely to be made by Information Asset Administrators, who will have more of an operational and day-to-day knowledge of the Information Assets.

Information Risk Assurance Reports

Information Asset Owners must provide an annual assurance report to the SIRO on the risk status of their Information Assets and any other areas of information risk considered appropriate. The SIRO will report quarterly to the Integrated Governance Committee on Information Risk Management, which will include the status of risks to information assets.

Introducing New Information Assets

When new Information Assets are considered the Trust must follow its formal due diligence processes. These will be triggered through submission of business cases and where privacy impact assessments are identified as required. A completed and agreed Privacy Impact Assessment will be required if the asset collects personal identifiable data and an Information Asset Risk Assessment checklist must be completed to ensure that it meets the Trust security standards and is included within the Information Asset Register for further information please see the Trust Confidentiality & Data Sharing Policy

3.5 Information Quality Assurance

The Trust has a policy for Data Quality and Records Management policy to ensure the effective management of records. Audits will be undertaken or commissioned to assess the quality of data and record management agreements. Senior Managers within Clinical Business Units will be expected to take ownership of, and seek to improve, the quality of data within their services. Wherever possible, information quality will be assured at the point of collection. The Trust promotes data quality and record management through policies, Procedures/user manuals and training, in accordance with national standards.

3.6 Training

All staff will be required as part of Trust Induction to complete the Mandatory Information Governance training module or to provide proof that this has been completed at another organisation. As part of on-going training staff will be required to complete the annual Information Governance "Refresher Module". Monitoring of staff completion of this training will be undertaken by the Information Governance Committee.

3.7 Year on Year Improvement Plan and Assessment

The Health & Social Care Information Centre requires the Trust to annually assess their performance in Information Governance against the Information Governance Toolkit. Reports and proposed action/development plans will be presented to the Information Governance Committee and the Trust's Executive Committee for approval as a result of the annual Information Governance Toolkit report.

4. MONITORING & COMPLIANCE

The monitoring & compliance of this policy will be by the Trust completion and submission of the Annual Information Governance Toolkit. Compliance against the standards provides the Trust with assurance that a robust framework is in place. Internal monitoring and review will be undertaken by the Information Governance Committee with regular provision of reports submitted to the Executive Committee.

5. DEVELOPMENT & CONSULTATION PROCESS

This policy has been developed by the Information Governance Manager. The policy has also been reviewed by the Caldicott Guardian, Senior Information Risk Owner and Information Governance Committee.

6. DUTIES & RESPONSIBILITIES

Chief Executive

The Chief Executive as the accountable officer is responsible for the management of the organisation and for ensuring appropriate mechanisms are in place to comply with Information Governance.

Caldicott Guardian

The Trust's Caldicott Guardian has a particular responsibility in ensuring that a robust framework to comply with all legislation is in place across the Trust. It is the responsibility of the Caldicott Guardian to ensure that every member of staff within the Trust complies with all requirements of Information Governance, which is driven by various legislation and guidelines issued by the Department of Health and other sources.

Senior Information Risk Owner

The Senior Information Risk Owner is responsible for ensuring that the Trust manages its information assets securely and has taken appropriate action to mitigate against any data loss/data breach incidents and that all data loss/data breach incidents are monitored and reviewed.

Information Governance Manager & Information Governance Committee

The Information Governance Manager is responsible for ensuring that the Trust is working within the legal framework of the Data Protection Act, Freedom of Information Act, NHS Code of Practice for Records Management, NHS Code of Practice for Confidentiality, Information Governance Standards, Health & Social Care Information Centre. The Information Governance Manager is the designated Trust representative that liaises with the Information Commissioners Office. The Information Governance Committee ensures the Trust operates within the Information Governance framework and reports to the Executive Committee.

Senior Managers

It is the responsibility for all Senior Managers to ensure that staff work within the boundaries of the Trust policies and procedures and are aware of their responsibilities.

All staff

All employees of the Trust, or staff working in a voluntary capacity, independent contractors must adhere to the current legislative framework and Trust policies.

Rights Analysis

Title:	Information Governance and Information Risk
Area covered:	Trust wide

What are the intended outcomes of this work? <i>Include outline of objectives and function aims</i>
To give guidance for all staff outlining their responsibilities for adhering to Information Governance and Information Risk across the organization.
Who will be affected? <i>e.g. staff, patients, service users etc</i>
Staff

Evidence
What evidence have you considered?
Disability (including learning disability)
Sex
Race <i>Consider and detail (including the source of any evidence) on difference ethnic groups, nationalities, Roma gypsies, Irish travellers, language barriers.</i>
Age <i>Consider and detail (including the source of any evidence) across age ranges on old and younger people. This can include safeguarding, consent and child welfare.</i>
Gender reassignment (including transgender) <i>Consider and detail (including the source of any evidence) on transgender and transsexual people. This can include issues such as privacy of data and harassment.</i>
Sexual orientation <i>Consider and detail (including the source of any evidence) on heterosexual people as well as lesbian, gay and bi-sexual people.</i>
Religion or belief <i>Consider and detail (including the source of any evidence) on people with different religions, beliefs or no belief.</i>
Pregnancy and maternity <i>Consider and detail (including the source of any evidence) on working arrangements, part-time working, infant caring responsibilities.</i>
Carers <i>Consider and detail (including the source of any evidence) on part-time working, shift-patterns, general caring responsibilities.</i>
Other identified groups <i>Consider and detail and include the source of any evidence on different socio-economic groups, area inequality, income, resident status (migrants) and other groups experiencing disadvantage and barriers to access.</i>
Cross Cutting <i>implications to more than 1 protected characteristic</i>

--

Human Rights	Is there an impact? How this right could be protected?
Right to life (Article 2)	<i>Not engaged</i>
Right of freedom from inhuman and degrading treatment (Article 3)	<i>Not engaged</i>
Right to liberty (Article 5)	Not engaged
Right to a fair trial (Article 6)	Not engaged
Right to private and family life (Article 8)	<i>Not engaged</i>
Right of freedom of religion or belief (Article 9)	Not engaged
Right to freedom of expression Note: this does not include insulting language such as racism (Article 10)	Not engaged
Right freedom from discrimination (Article 14)	Not engaged

Engagement and Involvement <i>detail any engagement and involvement that was completed inputting this together.</i>

Summary of Analysis <i>This highlights specific areas which indicate whether the whole of the document supports the trust to meet general duties of the Equality Act 2010</i>
Eliminate discrimination, harassment and victimisation
Advance equality of opportunity

Promote good relations between groups

What is the overall impact?

Addressing the impact on equalities

There needs to be greater consideration re health inequalities and the impact of each individual development /change in relation to the protected characteristics and vulnerable groups

Action planning for improvement

Detail in the action plan below the challenges and opportunities you have identified. *Include here any or all of the following, based on your assessment*

- *Plans already under way or in development to address the **challenges** and **priorities** identified.*
- *Arrangements for continued engagement of stakeholders.*
- *Arrangements for continued monitoring and evaluating the policy for its impact on different groups as the policy is implemented (or pilot activity progresses)*
- *Arrangements for embedding findings of the assessment within the wider system, OGDs, other agencies, local service providers and regulatory bodies*
- *Arrangements for publishing the assessment and ensuring relevant colleagues are informed of the results*
- *Arrangements for making information accessible to staff, patients, service users and the public*
- *Arrangements to make sure the assessment contributes to reviews of DH strategic equality objectives.*
